REASONS FOR ALLOWANCE

1. Claims 1-49 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest the Applicants claimed invention. The Applicant teaches of using targets to assist with local virtual reconstructions to a unitary global coordinate system. The Applicant has amended the claims to overcome the rejection in view of Mack et al. The Applicants arguments filed on 6/22/2005 are persuasive. In particular the feature as found in claims 1 and 25, comprising an object and at least one target independent of said object, and illuminating at the object and target to facilitate disambiguation between the object and target, is not taught by Mack. While Mack et al. teaches of an illumination of a "target object" (equivalent to applicants object) and markers (equivalent to applicants target) for distinguishing the target object, the markers are not independent of the target object as claimed. New prior art Saund teaches of an independent object and target, figure 1 item 10 and 15, however the targets appears to be used for calibration and not disambiguation while illuminating the object and target. Saund does not teach of using targets to assist with local virtual reconstructions to a unitary global coordinate system. Further there is no motivation to combine the inventions of Mack et al. and Saund to produce the claimed invention. Therefore said feature in combination with the other limitations of claims 1 and 25 are allowable over the prior art of record.
